Space PRO®

Electrical Mobile Storage Systems

SETTING THE NEW STANDARD

"Our electric mobile system allows our staff to easily access information easier and faster than ever before. It has provided us safe and efficient filing which is most welcomed in our hectic environment." Metropolitan Police Department Acting Director

Space PRO® Electrical Mobile Storage

Setting the New Standard for:

♦ *Reliability*

SpacePRO® Advanced technology allows failure prone mechanical parts to be replaced with state of the art components such as electro-static touchpads and photo-optic aisle width adjustments to avoid costly downtime and service calls. The logic system even recognizes weight load changes and adjusts carriage operation automatically for reduced system wear and tear.

♦ *User Convenience*

SpacePRO® Advanced touchpad design provides oversized touch areas for "hands full" operation in an ADA friendly environment. Easy to read panels show carriage status displays at all times.

♦ *Flexibility*

SpacePRO® Make a movable carriage stationary on a permanent or temporary basis; adjust aisle width; make a single aisle or a group of aisles secure with limited access. Advanced RF transponders put these features are at your fingertips with, no special equipment or training.

Transponder Programming Keys

Space **PRO.** SAFETY SYSTEMS

Three level redundant safety is <u>standard</u> <u>with every SpacePro</u> electrical mobile system.

All systems include:

Infra-red Safety Sweeps

Passive Safety aisle protection

**And the advanced Motor Current Monitoring System (MCMS).**

Of course all systems are UL listed under the stringent series 1950 code requirements.

Can also provide motion detection or the state of the art Entry Detection System to meet specific user requirements

Can interface with file tracking software, building alarm and fire suppression systems.

This high profile pharmaceutical company uses electric mobile systems to house highly confidential files relating to the various drugs that are being manufactured as well as research files. *"This is the perfect system for our requirements. Not only are we able to interface with our main frame system that allows us real time file tracking, but the electric mobile filing provides us the file security required by our clients and government regulations!"*
